ALUMINIUM BLINDS 25 mm / 16 mm **22**
Basic table 25 mm **23**
Basic table 16 mm **25**
Extra charges **26**

ALUMINIUM BLINDS 50 mm **29**
Basic table **30**
Extra charges **33**

Extra charges - electric drives and controls for free hanging roller blinds **38**
General Terms and Warranty Conditions **43**

HOW TO USE THE PRICE LIST?

IT'S SIMPLE!

FOLLOW THE INSTRUCTIONS BELOW!

01. Dimensions

Choose the system as well as the roller blind model and take the measurements.

02. Price

Find the price of given dimensions in the price table, according to the price group **(PG)** of the chosen fabric.

03. Extra charges

You will find extra charges for certain models, electric drives and controls and optional accessories in the extra charge section.

04. Important

Note the icons. code 1234
You will find their meaning at the bottom of pages in the further part of the price list.
If you have any questions, please contact our Customer Service.

WOODEN BLINDS **25 mm**

Important

You will find detailed information on dimensions, components and horizontal blinds constructions in the product brochure. The brochure is also available in the digital version on our website.

Informations

1. The standard installation bracket is a universal twist hanger that enables blind installation both on the wall and on the ceiling. The quantity of hangers received in a set will correspond to the width and weight of the blind. You can change to a different installation holder if required, thus enabling you to make the correct choice in the ordering form.
2. The width ordered is the total width of the blind. The blind height is measured when **in the closed position**.
3. Minor changes in colours and texture are permissible between individual slats.
4. The average weight of a square metre of the 25 mm wooden blind is about 2 kg.
5. A front covering strip of the upper rail is typically used; a curtain type cover (with side finishing) is available for an extra cost.
6. Each slat colour typically has matching colours of the upper rail, lower beam, textiles and operating bells. It is possible to modify the standard option by adding the correct information in the ordering form (entering selected colours in comments and, for instance, an operating bell shape).

Basic table and extra charges

Basic table for model:
HJ 25-01 (page 06 - 07).

Extra charges for models:
HJ 25-03, HJ 25-05 (page 08 - 09).

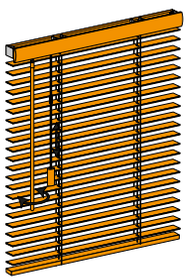

Extra charges for models with electric motors:
HJ 25-05 (page 38 - 42).

25 mm

WOODEN BLINDS 25 mm

BASIC TABLE

Recommended retail prices including VAT

WIDTH

Did you know that?

Special non-invasive holders enable the installation of the blind on the window-leaf without the need for drilling holes in the window frame. A blind installed in this way may be dismantled at any time quickly and simply, leaving no trace on the window frame.

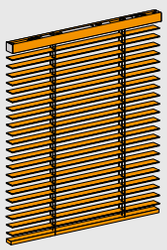

WOODEN BLINDS 25 mm

ADDITIONAL OPTIONS

Mono-Chain Blind
Endless chain operation
Extra charge for HJ 25-03 type

** Available colours: white (WE), grey (GR), brown (BR), black (SH), gray anthracite (AN), beige (BE)

WOODEN BLINDS **50 mm**

Important

You will find detailed information on dimensions, components and horizontal blinds constructions in the product brochure. The brochure is also available in the digital version on our website.

Informations

1. The standard installation holder is a universal twist hanger that enables blind installation both on the wall and on the ceiling. The quantity of hangers received in a set will correspond to the width and weight of the blind. You can change to a different installation holder if required, thus enabling you to make the correct choice in the ordering form.
2. The width ordered is the total width of the blind. The blind height is measured when **in the closed position**.
3. Minor changes in colours and texture are permissible between individual slats.
4. The average weight of a square metre of the 50 mm wooden blind is about 2 kg. (lamele z kolekcji Rustic - 3 kg.)
5. A front covering strip of the upper rail is typically used; a curtain type cover (with side finishing) is available for an extra cost.
6. Each slat colour typically has matching colours of the upper rail, lower beam, textiles and operating bells. It is possible to modify the standard option by adding the correct information in the ordering form (entering selected colours in comments and, for instance, an operating bell shape).
7. A price list of Retro system blinds with a wooden 50 mm slat is available on pages 18 - 19.

Basic table and extra charges

Basic table for model:
HJ 50-02 (page 11 - 13).

Extra charges for models:
HJ 50-03, HJ 50-04, HJ 50-05, HJ 50-06
(page 13 - 14).

Extra charges for models with electric motors:
HJ 50-05 (page 38 - 42).

Important!

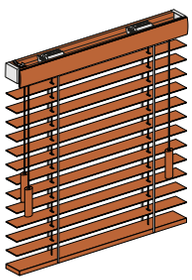

Slats from FAUX WOOD – PCV collection (S-5080, S-5081,S-5082, S-5083, S-5084) made from foamed PCV, which may be used in rooms with higher humidity (e.g. bathrooms, kitchens). However, long-term exposure to the sun and higher temperatures cause PCV slats to deform and are not covered by our warranty. In order to minimise the deformation of slats, we use more ladders than wooden slats.

Price estimation step by step

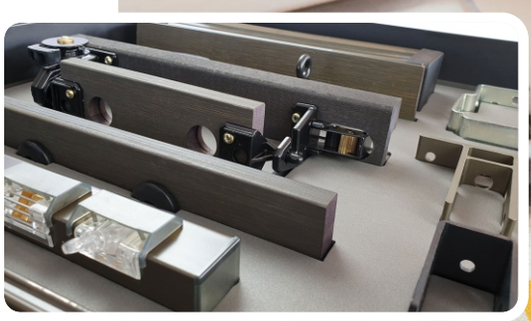

For the purposes of the calculation, we used the following parameters:
Measurements - 142 cm x 197 cm
Model - HJ 50-06 (endless cord)
Slat - 0-5125 (PG:0)
Extra charge - Ladder tape 38 mm

1. Take the measurements e.g. 142 cm x 197 cm (width x height)
2. Find the price in the price table, according to both: measurements rounded up and price group 150 cm x 200 cm (695 €)
3. Choose a suitable roller blind model HJ 50-06 - 160 €
4. Choose the Ladder tape 38 mm additionally 29 €
5. Recommended retail price including VAT (695 + 160 + 29) 884 €

Did you know that?

The Shadow-System also offers blinds in special forms, although the production technology of these forms is quite complex. If you are interested in ordering such a blind, then please do contact the Customer Service Office. In order to confirm any possibility of putting together a request and obtaining a pricing, please send a technical drawing to us with all the dimensions and options which you would like to use in a given blind.

TECHNICAL CATALOGUE

To complement the collection of slats, we have prepared a catalog of technical components that will greatly facilitate the presentation of our range of horizontal blinds.

Important

You will find detailed information on dimensions, components and horizontal blinds constructions in the product brochure. The brochure is also available in the digital version on our website.

Informations

1. The standard installation bracket is a universal twist hanger that enables blind installation both on the wall and on the ceiling. The quantity of hangers received in a set will correspond to the width and weight of the blind. You can change to a different installation holder if required, thus enabling you to make the correct choice in the ordering form.
2. The width ordered is the total width of the blind. The blind height is measured when **in the closed position**.
3. Minor changes in colours and texture are permissible between individual slats.
4. The average weight of a square metre of the 50 mm wooden blind is about 2 kg. (lamelle from Rustic collection - 3 kg.)
5. Each slat colour typically has matching colours of the upper rail, lower beam, textiles and operating bells. It is possible to modify the standard option by adding the correct information in the ordering form (entering selected colours in comments and, for instance, an operating bell shape).

Basic table and extra charges

Basic table for models:
HJR 50-01, HJR 50-02 (page 18 - 19),

AJR 50-01, AJR 50-02 (page 20 - 21).

Please remember...

Retro blinds typically have tape ladders with a width of 25 mm. It is possible to equip Retro blinds free of charge with tape ladders with a width of 38 mm.

ALUMINIUM BLINDS **25 / 16 mm**

Important

You will find detailed information on dimensions, components and horizontal blinds constructions in the product brochure. The brochure is also available in the digital version on our website.

Informations

1. The standard installation holder is a universal twist hanger that enables blind installation both on the wall and on the ceiling. The quantity of hangers received in a set will correspond to the width and weight of the blind. You can change to a different installation holder if required, thus enabling you to make the correct choice in the ordering form.
2. The width ordered is the total width of the blind. The blind height is measured when **in the closed position**.
3. The average weight of a square metre of the 25 mm wooden blind is about 2 kg.
4. Each slat colour typically has matching colours of the upper rail, lower beam, textiles and operating bells. It is possible to modify the standard option by adding the correct information in the ordering form (entering selected colours in comments and, for instance, an operating bell shape).

Basic table and extra charges

Basic table for models:
AJ 25-01 (page 23 - 24),
AJ 16-01 (page 25).

Extra charges for models:
AJ 25-02 / AJ 16-02,
AJ 25-03 / AJ 16-03,
AJ 25-05 / AJ 16-05,
AJ 25-01D / AJ 16-01D (page 26).

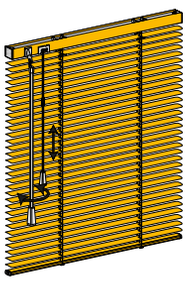

Extra charges for models with electric motors:
AJ 25-05 / AJ 16-05 (page 38 - 42).

16 mm
25 mm

ALUMINIUM BLINDS 25 mm

BASIC TABLE

Recommended retail prices including VAT

Width: * max. 300 cm
Height: * max. 300 cm
Types of operation: cord-rod, Monomagic, endless chain, motor
Mounting: wall, ceiling or window frame.

* Depending on a blind model and slat

Wodden bottom rail

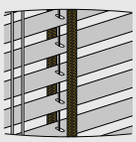

15,40 € /prm

Did you know that?

Our prices also include non-invasive mounting for horizontal blinds. 25 mm. This is a simple and quick method of blind installation. The use of these types of holders make it possible to dismantle a blind at any time, leaving no traces that are usually formed as a result of traditional invasive installation. Two types of holders are available: a hanger for mounting the blinds on the window-leaf and a non-invasive holder for lateral guide mounting.

Price estimation step by step

For the purposes of the calculation, we used the following parameters:
Measurements - 78,6 cm x 142 cm
Model - AJ 25-03 (Endless chain)
Slat - S-0507 AL (PG:S)
Extra charge - Side guiding and non-invasive clamp for side guiding

1. Take the measurements e.g. 78,6 cm x 142 cm (width x height)
2. Find the price in the price table, according to both: measurements rounded up and price group 80 cm x 150 cm (158 €)
3. Choose a suitable roller blind model) AJ 25-03 (69€)
4. Choose the Side guiding (25 €) and non-invasive holders for PB additionally 12,00 €
5. Recommended retail price including VAT (158 + 69 + 25 + 12 €)= 264,00 €

Element used as a standard installation (optional).

* Available colours: white (WE), grey (GR), brown (BR), black (SH)

** Available colours: white (WE), grey (GR), brown (BR), black (SH), anthracite grey (AN), beige (BE)

ALUMINIUM BLINDS **50 mm**

Important

You will find detailed information on dimensions, components and horizontal blinds constructions in the product brochure. The brochure is also available in the digital version on our website.

Informations

1. The standard mounting fixture is a universal Twist bracket, which allows the blind to be attached to both the wall and the ceiling. The number of brackets supplied depends on the width and weight of the blind. You can also select a different mounting fixture using the order form.
2. The width specified in the order is the total width of the blind. The height of the blind is measured in the closed position.
3. The average weight of 50 mm aluminium blinds is approximately 1 kg per 1m ^{2}
4. The colours of the headrail (top rail), bottom bar, textiles (cords/tapes), and control knobs are standardly matched to the slat colour. The standard option can be changed according to your preference by providing the necessary details in the order form (please specify the desired colour and, for example, the shape of the control knob in the "Comments" field).
5. The price list for 50 mm Retro blinds with wooden slats can be found on pages 18-19.

Basic table and extra charges

Basic table for model:
AJ 50-02 (page 30 - 32).

Extra charges for models:
AJ 50-03, AJ 50-04, AJ 50-05, AJ 50-06 (page 33).

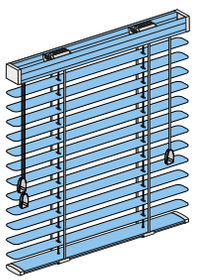

Extra charges for models with electric motors:
AJ 50-05 (page 38 - 42).

HEIGHT OF THE PACKAGE

BLINDS PACKAGE
WHAT IT IS?

The tables below indicate the height of the package of pulled-up blinds. The values given differ according to the type of textiles: ladder cord or ladder tape. These must be taken into account when installing the blind over a fully opening window or balcony door. There is no single suggested lintel size and the height of the lintel is based on the designers' original assumptions. Therefore, in order to avoid a situation where the installed blind will restrict to open the window/balcony sashes fully, it is essential to use the tables below. A separate table applies for Retro blinds.

ALUMINIUM BLINDS

ALUMINIUM BLINDS 25 mm

HEIGHT OF BLIND [CM]	HEIGHT OF PACKAGE [CM]* LADDER CORD	LADDER TAPE
50	8 cm	9 cm
100	9 cm	10 cm

COULISSE MOBILE APPLICATION - MOTION BLINDS

HIGHER LEVEL OF OPERATION.

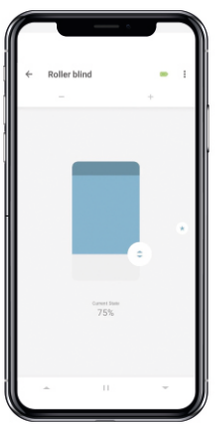

Simultaneous control of many roller blinds by easy to use Motion Blinds application. Make your home automated thanks to programmed operation modes and the timer. Control the interior climate by reducing the loss of thermal energy. Find proper balance between amount of light and privacy protection. Thanks to the Motion Blinds application you set optimal position of roller blinds and check the current battery charge level

Set scenes with pre-set positions

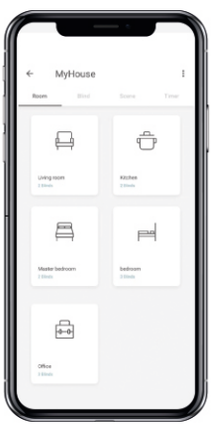

Add timers to automate scenes

Create rooms with multiple blinds

Send the blind to any desired position

Compatible with different types of blinds

Download the Motion Blinds application on a mobile device from the App Store or Google Play shop!

GET IT ON Google Play

HORIZONTAL BLINDS
QUALITY STANDARDS

Below you shall find examples of allowable deformations in the form and dimensions of wooden slats due to the natural (hygroscopic) properties of wood. The quoted dimension tolerances are described in the European standard **PN-EN 13120+A1 *'Internal blinds. Performance requirements including safety'*.**

Bow

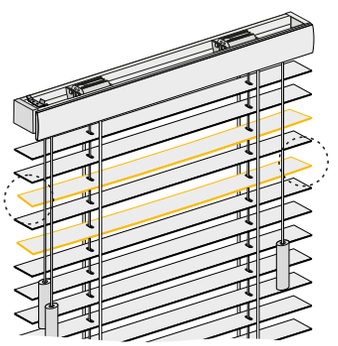

Slats length	Max. allowable bow
< 150 cm	5 mm
150 - 250 cm	10 mm
250 - 350 cm	15 mm

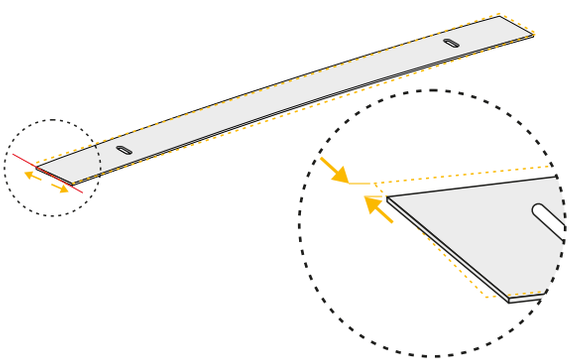

Bending

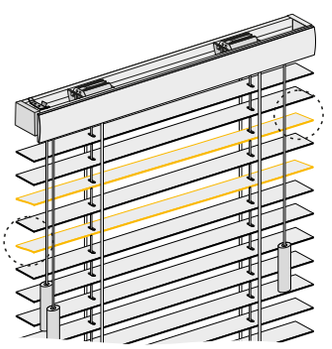

Maximum bending - **up to 2 mm per metre of the slat**

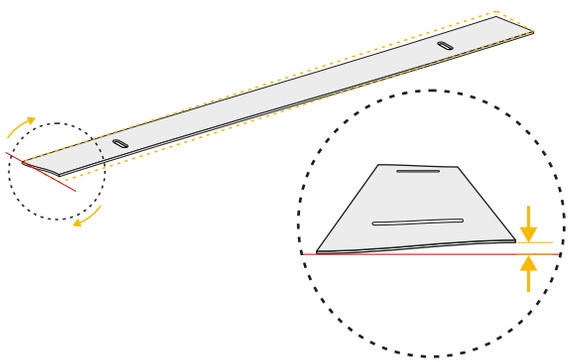

Twisting

Maximum twisting - **up to 2 mm per metre of the slat**

WOODEN SLATS

Below we present some imperfections that may occur on the surface of wooden slats, which result from the natural properties of wood and production processes and cannot be a reason for complaint.

1 Differences in structure and colour

Slight differences in the shading and structure of wooden slats are allowed. The light source (natural, artificial) and the angle of incidence may influence the perception of colour and structure of wooden slats.

In the order forms, please remember to include the information on which blinds hang next to each other. Thanks to this, we will attempt to use slats from the same batch – with as similar colours as possible - for blinds provided for the same room.

2 Wood rings and knots

Rings and knots are a natural property of wood – their distribution across the slats surface is uneven, they can also differ by size and shape.

3 Slats edge unevenness

Some slats edges may be rough or uneven.

Visible discolourations and gaps in bamboo slats

Bamboo slats (Bamboo and Bamboo Painted series) are made of pressed and glued bamboo battens. This group of slats may include slight discolourations and gaps at gluing spots.

Slats finger joints

The surfaces of some slats may exhibit joints.

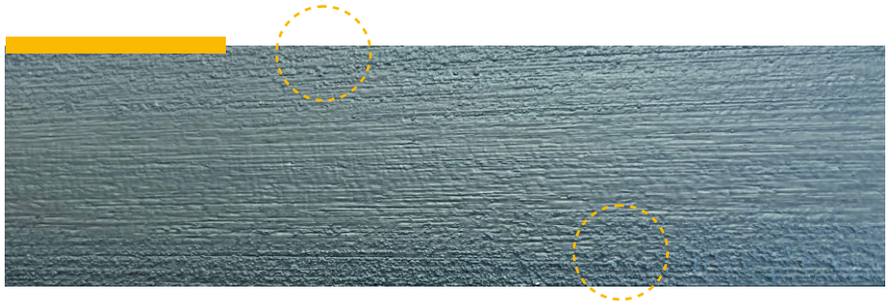

5

Roughness of the slats in the Abachi AFRICA collection

6

Natural roughness and slight structural irregularities may be visible on the surface of the slats from the Abachi Africa collection. These are attributable to the wood's properties and natural grain. Variations in texture may be both visible and perceptible to the touch.

Discoloration and color differences

7

The color of individual slats may vary slightly from the others. Natural discolorations and color differences are visible in the photo when the entire blind is closed. This is a natural characteristic of the wood and can result in individual slats appearing lighter or darker.

The natural properties of wood

Wood, due to its natural hygroscopic properties (the ability to absorb water vapour dissolved in the air) reacts to changes in temperature and humidity in the room. Depending on the season, air humidity varies. In Winter, due to room heating operating, air humidity can drop to 25%, and in the Summer, on rainy days, it often exceeds 90%. Both air humidity changing over the course of the year, as well as high Summer temperatures may influence the wooden slats causing their slight deformations – a natural property of wood.

PVC SLATS

The slats of the Faux wood – PVC – series (S-5080, S-5081, S-5082, S-5083, S-5084) are made of PVC foam, thanks to which they can be used in rooms experiencing elevated humidity (bathrooms, kitchens). Keep in mind, however, than when exposed to sunlight for longer, and at higher temperatures, PVC slats may tend to become wavy/ deform, a fact that is not covered by warranty. In order to minimise deformations, we use a higher number of ladders than for wooden slats.

HORIZONTAL BLINDS
QUALITY STANDARDS

FABRIC

1

Differences in tone

Slight differences in the tone of ladder cord and ladder band and the operation cords are allowed.

2

Ladder flexibility

Both cord as well as band ladders may stretch under loads, causing the blinds to change their height. For two individual blinds next to each other it may be that their slats will hang at different heights.

3

Slat colours

In case of high colour contrasts between the slat and the textile ladder, the slats may become slightly discoloured. This effect is most intense for white slats and black ladders.

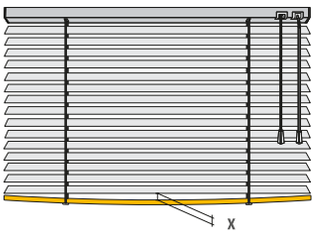

Information!

Ladders in colors contrasting to the color of the slats are properly steamed before they are installed in the blinds. This is to minimize the formation of discoloration on the slats.

1 Bottom rail drop

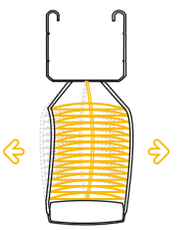

Depending on the width of the blinds, the lower batten may bend down slightly.The allowable bend values for the lower batten depending on the width of the blinds:
1) up to 150 cm wide => max. drop 0.5 cm
2)150-250 cm wide => max. drop 1 cm
3) over 250 cm wide => max. drop 1.5 cm

x
place of measuring the deflection of the bottom rail drop

2 Set bending

It is possible that the set of slats bound together bends to the front or back by +/ - 1%.

3 Dimension stability

Over time, the dimensions of a window blind may change;
- height +/ - 3% due to the flexibility of the fabric ladder
- width +/ - 0.5% due to the natural properties of wood

4 Proper closing of the blinds

The slats of the blinds can turn in both ways, however, the proper closing of the blinds (to reduce incoming sunlight) entails aiming the lower edge of the blinds towards the room.

Take into account that blinds do not guarantee full blackout of a room.

Properly closed blind

incorrectly closed blind

GENERAL WARRANTY TERMS AND CONDITIONS

1. SHADOW-SYSTEM Sp. z o.o. with its seat in Kawle Dolne 4F, 83-304, Przodkowo, hereafter referred to as Guarantor, warrants good quality and smooth operation of a new product, according to standards provided for a given type of products, subject to their intended use, under normal conditions.

2. SHADOW-SYSTEM Sp. z o.o. provides the warranty for:
   - 36 months from the date of purchase system for pleated blind, roller blind venetian blinds,
   - 12 months from the date of purchase of fabrics, wooden and aluminium slats.

3. The warranty covers only defects in product resulting from the Manufacturer's fault. For such it shall be deemed the use of defective materials, production faults and construction errors.

4. During a physical reception of product in the Guarantor's headquarter or on the product delivery day by a freight company, the Buyer is obliged to check the quality, dimensions and the completeness of delivered product according to the order, otherwise the right to make a complaint regarding quality and delivery completeness will be forfeit.

5. Upon discovery of a defect in a product, the Buyer is obliged to notify it to the Guarantor within 14 days. Failure to comply with anyone of the abovementioned conditions will result in losing the warranty rights.

6. All claims under the warranty are considered in the Guarantor's headquarter only (SHADOW-SYSTEM Sp. z o.o., Kawle Dolne 4F, 83-304 Przodkowo). The Parties shall individually agree on the way for returning a product to the above headquarter.

7. The basis for making a claim under the warranty is a properly filled in warranty card, original bill of purchase (receipt or invoice) and a completely filled in complaint document..

8. The completed complaint form, scanned bill of purchase as well as comprehensive photographic documentation shall be sent to the e-mail address: info@shadow-system.pl

9. Guarantor is obliged to investigate the legitimacy of a claim under the warranty within 14 days after receiving a written complaint, and in case if visual inspection of goods with defect is necessary, within 14 days after the date of returning goods to the Guarantor's headquarter.

10. Guarantor shall not be liable in case of:
    - Mechanical damage or damage due to misuse or negligent handling, storing or using under improper conditions,
    - Natural wear and tear of original elements, parts and accessories caused by their normal use,
    - Modification of original product and interference into its structure by third parties, as well as use of other spare parts or accessories than those recommended by the Guarantor
    - Any repairs made by unauthorised personnel
    - Mounting inconsistent with good construction practices and with manufacturer's instructions,
    - Use inconsistent with the user manual,
    - Smells emitted by the product, coming from components used for the production (e.g. natural smell of bamboo slats),
    - Natural small plane deformation of aluminium slats, wooden slats and fabrics surfaces,
    - Differences in shades and texture of wooden slats due to natural characteristics of timber,
    - Discolouration and other changes on the surface of elements caused by weather conditions,
    - Differences in colours between a ready-made product and an outdated sampler or catalogue,
    - Maintenance, cleaning the products, battery replacement in electrical components,
    - Damage due to random incidents (fire, flood, lightning, low or too high temperatures and any other natural disasters).
    - Deformations of the PVC slats' surface, including 'warping' of slats between the ladder cords,
    - Bending of the bottom rail for wooden and aluminum blinds – when using (5, 6, or 7 ladder cords)

11. Products exceeding minimum and maximum recommended dimensions specified in the technical information shall not be subject to the General Terms and Conditions of Warranty and are made to the sole responsibility of the Buyer. In such case the Guarantor shall make every effort to provide a fully functional product.

12. If the complaint is accepted, the Guarantor agrees to repair or replace the defective product as soon as possible.

13. Should a repair or replacement be impossible or should it require excessive costs, the Guarantor undertakes to take defective product back and return the purchase cost.

14. If the complaint is accepted and it is impossible to remove the manufacturing defects of the aluminium slats, wooden slats or fabrics because of e.g. withdrawal from the offer within the warranty period, the Guarantor may suggest a replacement for a colour-similar component.

15. In case the complaint is rejected, the product is returned at the Buyer's expense

16. The warranty for the consumer goods within the meaning of the Act of 27.07.2002 on specific conditions of consumer sales and on the amendment to the Civil Code (Dz.U. 2002/141/1176), shall not exclude, limit or suspend the Customer rights when the provided product is inconsistent with the purchase agreement.
